The Project at a Glance

- Initial Situation
 In order to compete in the competitive healthcare market,
 MedView needed to work more efficiently.
- 2 Specific Challenge
 One of the major issues was HR, where MedView was using various HR tools and apps, which employees found difficult to
- navigate and lacking in transparency.

 3 Solution
 - Dynamics HR Management replaced a range of HR tools with one holistic solution.
- Benefit
 MedView not only saw a rise in efficiency, they also noted a rise in employee satisfaction.
- (5) Thanks
 "Dynamics HR Management has saved my company time and money, and most importantly it makes my staff much happier."

Implementing the Dynamics HR Management solution at MedView diagnostics

Customer Vision

The current healthcare market is extremely competitive. Customers demand quality, competence and adherance to legal rules and regulations. In order to succeed, MedView needed to work more efficiently. One of their largest challenges was HR which still relied heavily on the manual processing of information.

Specific Challenges

A huge problem was the use of various programs in HR which lacked integration and transparency. The tools all had different interfaces, which HR employees found confusing and difficult to navigate. Searching for information wasted many hours a week, as it was often not even clear in which tool the information was being stored.

My staff love having just one password - their Microsoft Windows password - instead of having to remember log in details for all the different tools. And they can work in Outlook. What an improvement!

Jürgen Jaksch, CEO, MedView diagnostics

Solution Approach

Dynamics HR Management provided a complete solution, which covers all areas of HR including recruitment, staff administration, talent management and employee self-service, MedView employees now have up-to-date access to data and information needed to meet demanding deadlines and ensure smooth communication throughout the organization.

They were able to eliminate other HR tools for expense reports, performance reviews, and contract management.

Working in an integrated platform enables employees to quickly access any information required. They are no longer having to update multiple records in different tools.

Benefit

MedView experienced an immediate rise in productivity and efficiency as their employees no longer spent hours searching in different programs for the required information. This also led to a rise in employee satisfaction and a reduction in the risk of burnout.

Thanks

"We have a great working relationship with Dynamics HR Management, a wonderful IT company just like Microsoft. All our expectations have been met. That brings me great satisfaction."
